

*Do you use ultra-rib pipe for risers?
Need to get an even cut?*

Get it done with our cut-off saw in about 15 seconds!

Sim/Tech Filter introduces a new cut off saw for 24" ultra-rib pipe. The new cut off saw accurately cuts off pipe in a horizontal or vertical position. The real advantage is that you can cut flush with the grade after the ultra-rib pipe has been backfilled. The saw features a 5.8 Amp motor and carbide tipped blade. It will cut a 24" pipe off in approximately 15 seconds. Two models are currently available. One to cut ultra-rib pipe made by PW Eagle (STF-URCO-SAW-pwe) and one to cut ultra-rib pipe made by Ipex (STF-URCO-SAW-ipex).
