

order part # **STF-APC24B - Black**
STF-APC24G - Green

SIM/TECH STF-APC24 series polycarbonate covers

- High strength polycarbonate
- Baked urethane finish
- Non-slip surface
- Soft urethane gasket
- Positive drop in feature
- Fits most 24" risers
- 4 holes and 4 dimples
- Ribless under-side design
- Easily insulated for cold climates
- Makes the perfect pump basin bottom

The access to your septic tank, pump vault or holding tank should be easy, accessible and safe. The STF-APC24 series of covers offers a great solution for almost all systems. They fit our STF-R824B segmented riser as well as almost all 24" risers and can be retrofitted to many existing systems. The STF-APC24 polycarbonate covers are the safest, strongest covers to hit the market--ever, meeting a H10 rating of 8,000 lbs. Our unique manufacturing process affordably achieves extreme strength and durability, and is 3x thicker than most lightweight covers. Polycarbonate is used for its high strength and weather durability, and like no other cover--we use a 2 component baked urethane finish for extended UV protection. This versatile cover is diamond plated and flat for easy foot traffic and lawn maintenance. It has 4 holes and 4 drillable dimples in two different hole patterns for universal fastening and the ability to fit multiple 24" diameter risers. Safety information is printed on each cover and can have a customizable oval center with name and logo. A soft gasket provides a good seal on various surfaces and our positive drop-in feature assures proper cover and gasket placement and makes alignment and installation easy. The overlapping design keeps debris away from the access hole unlike recessed covers, and now the riser can be brought to the surface without the cover extending above grade like concrete risers and covers. Because of it's ribless design easily insulated with Styrofoam for cold climates.

The STF-APC24 series can also be attached to our STF-R824B segmented riser to create a pump basin. *The STF-APC24 series of covers was designed with the STF-R824B segmented riser in mind and is the perfect mate.*

SIM/TECH also manufactures the STF-0124 cast iron cover for applications that require additional strength and weight.
